

DILEEP SAI GALLA

AI/ML Architect | Data Science | Full Stack AI Engineer

+91 6300668400 | dileepgalla200056@gmail.com | linkedin.com/in/galla-dileep-sai-b85829390 | github.com/shdileep | dileepsai-galla.dev

SUMMARY

Recent Integrated M.Tech graduate in Software Engineering specializing in AI systems, data engineering, and scalable analytics workflows. Skilled in Python, SQL, ETL pipelines, and API optimization, with experience in LLM evaluation, edge-case analysis, and validating reliable AI-driven products.

EDUCATION

Vellore Institute of Technology Integrated M.Tech — Software Engineering	Aug 2021 – May 2026 Chennai, India
Vignan Jr College Class 12th (AP Board)	Jun 2019 – Mar 2021 Guntur, India

TECHNICAL SKILLS

AI / ML & GenAI: Python, TensorFlow, PyTorch, NLP Pipelines, RAG Systems, Hugging Face Transformers, LLM Orchestration, Scikit-Learn

Full Stack Development: React, Angular, Node.js, Express, FastAPI, HTML5/CSS3, JavaScript (ES6+), TypeScript

AI Architecture & DBs: Agentic AI, Prompt Engineering, Vector Databases, LangChain, Multi-Agent Workflows, MySQL, PostgreSQL, Relational Schema Design

DevOps & Tools: Docker, Vercel, Firebase, Git / GitHub / GitLab, CI/CD Pipelines, Playwright, Appltool Eyes, Postman, Linux/Bash Scripting

WORK EXPERIENCE

Easehawk Technologies Pvt. Ltd. May 2026 – Present
AI/ML Architect & Full Stack Engineer Intern Rohini, Delhi

- Architecting robust multi-agent workspace pipelines integrating asynchronous celery queues, FastAPI backend protocols, and dynamic state machines, boosting request processing throughput by 42%.
- Developing high-recall Retrieval-Augmented Generation (RAG) systems featuring hybrid semantic-keyword searches and top-k context rankers to reduce token overhead by 30%.

Externsclub Pvt. Ltd. Sep 2023 – Nov 2023
AI/ML Intern Bengaluru, Karnataka

- Pioneered 'ResumeAI' by pairing a fine-tuned T5 text transformer with a vector RAG pipeline, successfully reducing raw response hallucination rates by 25%.
- Trained high-accuracy text classifiers using custom TF-IDF feature extractions and optimized Random Forest estimators, validating a 91.4% target classification benchmark.

Engineer Core May 2023 – Jul 2023
Web Development Intern Remote

- Co-designed 'NextTrip,' a complex concurrent bus reservation engine in Express.js supporting 100+ simulated active sessions without reservation collisions.
- Constructed row-locking SQL transactions and serialization isolations on PostgreSQL to protect seat allocations during high-frequency parallel booking queues.

PROJECTS

Moxsend AI [Express.js, Node.js, React, PostgreSQL, Tailwind CSS] May 2023 – Jul 2023

- Traditional bus e-ticketing systems suffer from rigid schedules, empty seat inefficiencies, static pricing, and slow checkouts under peak concurrency.
- Designing and shipping NextTrip, a high-concurrency bus booking platform incorporating responsive client-side flows and Express.js transaction modules.

Ujjwal-Hub (Patent in Progress) [Node.js, Express, React, Mapbox GL, PostgreSQL] Dec 2024 – Present

- Garbage collection routes are static, leading to empty bins being visited and full bins overflowing, causing high fuel costs and pollution.
- Orchestrating multi-zone bin Fill-Level telemetry and live driver fleet tracking on interactive map dashboards with sub-200ms latency.

FitMitra [Android SDK, Kotlin, Flask, PyTorch, TensorFlow Lite] Jul 2024 – Sep 2025

- Most fitness apps provide fixed, non-individualized nutrition and workout routines, leading to user drop-offs and poor fitness goals tracking.
- Building an interactive Android body metric classifier using TensorFlow Lite, Random Forest, and K-Means clusters to hit 82% fitness planning accuracy.

ACHIEVEMENTS

- Patent Filed: Waste Operations Optimizer:** Invented 'System and Method for Optimizing Garbage Collection Operations' [Application Number: 202641010900], transforming route computation under strict operational constraints.
- HackerEarth & Hackathons Enthusiast:** Solved complex algorithmic problems on HackerEarth, participating in state hackathons to solve structural and real-world bottlenecks.

CERTIFICATIONS

- Frontend Developer (React) (HackerRank)
- Advanced SQL Certificate (HackerRank)
- Software Engineer Intern Standard (HackerRank)
- Agile Scrum in Practice (Infocus Springboard)
